DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 76 to 171 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grobecker et al (AB), in view of applicants admission in the specification of what is know in the art of the properties of midodrine and desglymidodrine. Grobecker et al presents pharmacokinetical data comparing midodrine and desglymidodrine when administered by i.v. and orally in tablet or solution form. The instant pharmaceutical compositions are obvious from this disclosure since the references teach a tablet form of the medicine. The instant uses of the composition are also considered to be obvious since the compound is known to be a metabolite of midodrine and would therefore be expected to have the same properties as midodrine when administered orally in tablet form. Note that the plasma levels for each drug are about the same when the means of administration is the same. The instant claims are considered to be prima facie obvious over Grobecker et al absent evidence of unexpected results commensurate in scope with the claims.
